

CROSSFIELD CHRONICLE

Provincial List

VOL. XXIII No. 21

CROSSFIELD, ALBERTA, JUNE 19th, 1930

PRICE 1.50 A YEAR

When the Price of Wheat Drops!

When the price of wheat drops or the crop yield is disappointing, it is a hard blow to the exclusive grain farmer. When the same thing happens to a mixed farmer, he can afford to smile. He loses part of his grain profits, but his cows and hogs will turn him a good living and pay his debts until another harvest.

This has been proved so many times that it is a small wonder people are turning to dairying as the one sure way to financial independence. Look at Western Canada! The three prairie provinces of Manitoba, Saskatchewan and Alberta received last year \$67,730,661.35 for butter, cream, cheese and other dairy products. That is a lot of money and it went to those western farmers who raised cows.

The sale of milk, cream, butter and cheese is assured the year round. The prices paid for dairy products are always high enough to assure the farmer a profit. In winter, when money is needed most, the prices for dairy products are uniformly high.

One of the secrets of successful dairying is found in the cream separator. A good one will earn money with every turn—but a poor one will lose it just as fast. If you are now operating an old cream separator that is pretty well worn, you should have your skin milk rested at the creamery. You may be surprised to find that you are losing cream every day.

A McCormick-Deering ball-bearing cream separator will pay for itself quickly on the average farm. IT GETS ALL THE CREAM—It is the easiest running machine in the world—it is easy to keep clean.

BEST OF ALL—it is easy to own. See us and learn how simple it is to use a McCormick-Deering cream separator while you pay for it. A demonstration right in your home will cost you nothing.

Important Meeting Saturday, June 21st.

A meeting of the directors of the Agricultural Society will be held in the Chronicle office on Saturday, June 21 at 8 o'clock, when arrangements will be made for holding the Sports and Celebration on July 4th. All those interested in helping with the celebration are asked to attend.

W. I. MEETING WELL ATTENDED

A well attended meeting of the Women's Institute was held at the home of Mrs. Mobbs on Tuesday afternoon. Mrs. Fitzpatrick gave a full report of the Provincial Convention.

Mrs. Gazeley gave a very interesting paper on health. Mrs. Boyce, constituency convenor gave a short address on the motto of the Institute.

A donation of \$5.00 was made by the Institute to the Board of Trade play-ground equipment fund. Miss Hewitt gave two instrumental selection on the guitar which were greatly enjoyed.

Presentation Made To Rev. Adams-Cooper

A very pleasant afternoon was spent at the home of Mr. and Mrs. Mossop on Thursday last, in honor of the Rev. Adams-Cooper, who is leaving to take up the work in Barbados. A cheque of \$25.00 was presented to Mr. Cooper by the president of the Women's Guild, as a token of affection and esteem from his parishioners, who all wished him Godspeed and better health on the island. A dainty tea was served by the women of the Guild, together with the Vestry.

The following being present; Mr. and Mrs. Fox, Mr. and Mrs. Jarman, Mr. and Mrs. Sefton, Mr. and Mrs. Major, Mr. and Mrs. Tredway, Mr. Mayman, Mrs. Layton, Mrs. Purvis, Mrs. Bishop, Mrs. Thomas, Mrs. Wolledge, Mrs. Willis, Mrs. Baker, Mrs. Addeley, Mrs. Riddell and family, Mrs. May, Mrs. Crocker, Mrs. Jones, Mrs. Hewitt, Mrs. Marshall, Mrs. Mobbs, Mrs. Belshaw, Mrs. Fitzpatrick, Mrs. MacFadyen, Mrs. Cruickshank.

Crossfield Club Drop Game to Beaver Dam

The Crossfield Foot Ball Team played at Beaver Dam on Sunday, June 15th, and although they lost out by a score of two goals to one, it was a very evenly contested and exciting game. A large crowd was present, giving both sides good support.

The Crossfield team has been greatly strengthened by the addition of Mr. Scott, an Old Country goalie who knows his football.

The Club who give a dance in the U. F. A. hall on Friday, June 27th. Borbridge's Orchestra. A good time is assured.

\$300 Spent in Purchasing Play Ground Equipment

The regular monthly meeting of the Crossfield and district Board of Trade was held at the Oliver Hotel on Friday evening last. Owing to other meetings being held throughout the country and also the weather being stormy, the attendance was not as large as usual. The Vice President T. Tredaway was chairman.

The proceedings opened with a discussion on the purchasing of play ground equipment to be erected in the park for the benefit of the children.

Mr. W. J. McMillan, who represented the Frost Play Ground Equipment Co. of Hamilton, Ont. was present at the meeting to explain the different articles of amusement and also the price of same. It was finally decided to purchase a 6 size swing and a giant stride and also a 16 foot slide at a cost of \$300.

Mr. Walter Major was appointed to select a committee of three with himself for the erection of the equipment when it arrived. It was also proposed and carried that a committee of three comprising the chairman and the secretary Mr. H. Fitzpatrick and Mr. W. K. Gibson to make arrangements for a celebration at the opening of the park.

Mayor Williams stated that the Village Council would erect two tables and four benches in the park and have them ready for the opening of the park.

A resolution was brought up by W. K. Gibson, that some effort should be made in the way of having a seed exhibit sent to the World's Seed Fair at Regina in 1932, from the Crossfield district, and the meeting gave Mr. Gibson permission to form a committee of three and interview the farmers of the district on the subject.

Prizes for the best kept garden in town sponsored by Mr. G. Sefton have been left over for another year.

Mr. F. Purvis read a letter which he had received from Mr. Cormie, Poultry Commissioner, Edmonton, stating he would come to Crossfield on June 21, to meet a number of those interested in poultry and discuss the matter of forming a Poultry Association here.

Horseshoe Tournament Saturday, June 21

The Crossfield and District Horseshoe Club will hold their first tournament on Saturday evening, June 21st, commencing at 7.30 p. m. The grounds will be laid out near the curling rink and some good prizes have been put up by the local merchants.

We want all the horseshoe pitchers in the Crossfield district to enter these weekly tournaments. Join the Club today and be ready to go on Saturday. Orval Bills is secretary and he will be glad to give you any information.

Hockey Star Returns

Donnie and Harold McFadyen returned home on Monday from Milwaukee, Wis., where they have been attending the Marquette University, and will spend the holidays at the home of their parents, Mr. and Mrs. Archie McFadyen.

Donnie has signed a contract to play professional hockey next winter with Chicago.

The McFadyen Bros. have added a whole lot of strength to the local baseball team. Manager Bills says he is now ready to play any team in the province.

Remember the Little World's Series on Sunday.

Paper Plates, Cups, etc. for the picnic can be purchased at the Chronicle office.

Extensive Program Has Been Arranged For This Season's Work In North

The growing importance of Canada's Far North is indicated in the extensive program now being arranged by the Department of the Interior through its North West Territories and Yukon Branch for its work in the Territories during the coming season. The activities and projects contemplated include arrangements for the reception and establishment of the Government reindeer herd, the enlargement of the medical service, the organization of the warden patrol in Thelon Game Sanctuary, the extension of the 1930 voyage of the Department's expeditionary ship, and the opening to prospectors of the Coppermine mineral reserve.

During the coming year most of the areas in the Northwest Territories where there are trading posts and settlements will be under active medical surveillance. Dr. Livingstone, senior medical officer, has already left for Churchill from which point he will travel by dog team to Chesterfield, where the Department of the Interior has built a house for his accommodation. He will remain in Hudson Bay. He will remain in charge of this post until the arrival of the Department's patrol ship "Boothie" early next autumn, when he will be replaced by the ship's doctor, Dr. Livingstone will return to North Sydney on the "Boothie" and will later proceed to Fort Smith, N.W.T., which is the Department's headquarters for the District of Mackenzie. At this point there is a large mission hospital, and he will take over the duties of the retiring medical health officer and have general supervision of the medical work of the district. The scattered nature of the medical work in the Mackenzie and Arctic coast to the east and west, under Dr. J. A. Urquhart, stationed at Akivik, has necessitated improved means of transportation, and to meet this a motor hospital boat has been built. The motor hospital boat with the opening of northern navigation will be taken to Fort Smith. From this point it will proceed under its own power to Akivik and at the same time carry Mr. J. F. Moran, chief inspector, on his annual tour of the Mackenzie district. Other departmental medical officers in the Territories are Dr. R. D. Martin, at the mouth of the Coppermine, and Dr. H. A. Stuart, on Baffin Island.

Preparations for the repatriation of the reindeer herd of 3,000 head, now on its way overland from Alaska, which will arrive early in 1931, will be completed this year. Mr. R. T. Forsell has arrived at Akivik by aeroplane and will supervise the erection of corrals and buildings on the range east of the Mackenzie delta. The Coppermine mineral reserve will be opened for staking on July 1, and Major L. T. Burroughs, who is in inspection of this field in 1929, will go in by aeroplane early in the season so as to be on the ground as soon as possible. Later, if conditions permit, he will fly to King William Island to carry on further investigations with regard to the fate of Sir John Franklin.

The organization of the regular patrol of the Thelon Game Sanctuary for the protection of wild life, particularly the musk-ox, will be completed this year. Mr. W. H. B. Hoare, who returned last autumn after a twenty months' investigation of the area, will go north to superintend the erection of warden cabins at the east and west ends of the sanctuary and the establishment in the reserve of warden and native helpers.

This year's cruise of the Department of the Interior's expeditionary ship "Boothie" will be slightly different from that of former years in order that she may enter Lancaster sound after the ice has moved out. If conditions then permit she will proceed to Winter Harbour, Melville Island and renew the supplies in the cache established by Captain Bernier, of C.G.S. Arctic, in 1908-9, which proved of such service to the northern party of the Canadian Arctic Expedition of 1913-18, and to Inspector Joy of the Royal Canadian Mounted Police during his notable winter journey of 1,800 miles, in 1929.

In addition to her usual work in carrying relief personnel and supplies to the various posts in the Canadian Arctic archipelago, the "Boothie" will take to Lake Harbour, on the southern shore of Baffin Island, sufficient lumber and supplies to erect a house for a resident officer there. This house will be occupied for the next

two years by Mr. and Mrs. J. Dewey Soper. Mr. Soper will continue his investigations respecting the blue goose and its nesting ground, will survey certain parts of the shore line, and make observations in regard to terrestrial magnetism. Mrs. Soper, who is a trained nurse, will be of great assistance in cases of illness among the natives. The services above mentioned are, it will be noted, nearly all additions to the administrative work of the North West Territories and Yukon Branch, which has been steadily growing for many years, and they show both the increased interest which citizens are taking in Northern Canada and the forthright which the Department of the Interior is exercising to ensure that the needs of the Territories will be adequately met.

Judgments Act Reciprocal

Ontario Makes Law Court Pact With Province Of Saskatchewan
The reciprocal enforcement of the judgments act is now in operation between Ontario and Saskatchewan, according to an announcement made by Attorney-General W. H. Price. The act was recommended in 1928 by the Dominion committee on uniformity of law and was passed by all the provinces last year, but was made subject to proclamation by order-in-council.

Ontario put through the order to make it effective on May 9, and Saskatchewan proclaimed its act on May 26. It will now be possible for a business concern to get a judgment in Ontario and collect from a person living in Saskatchewan without the necessity of suing on judgment, as was heretofore the practice.

Colonel Price stated that legislation, in his opinion, was of far-reaching benefit, and he expressed hope that the other provinces would soon see their way clear to follow in the course set by Saskatchewan. The committee on uniformity of law expressed the opinion, at the time they recommended such legislation, that with the opening of northern navigation it was most desirable.

Cattle In Prize Class

The highest individual price and the highest average price for the cattle from any one contributor at the recent National Holstein sale at Toronto, were secured by the six animals sent by the Canadian Pacific Supply Farm at Strathmore, Alberta. A four-year-old heifer from the herd brought \$1,526, the highest price of the sale; while a young bull brought \$875, the highest prize in the bull class. The six animals averaged \$658 as compared with \$327 for the average of the 64 animals vended at the sale.

Built First Automobile

Andrew Lawrence Riker, 81, designer and builder of the first gasoline-propelled locomotive, died recently at Fairfield, Conn. In 1884, he designed and built his first automobile, an electric tricycle. He introduced the sliding gear transmission, steel frame and the four-cylinder vertical motor with high tension ignition.

The automotive industry in the United States used 47,000,000 yards of upholstery cloth in 1928.

Labrador, often thought of as a land of the far north, is in reality no farther north than Scotland.

(By Annette W. Whiting).

2947

One of the most practical fashions of the season for the school miss of 8, 10 and 12 years is illustrated in navy blue wool crepe with beige crepe collar and cuffs. The scallops of collar and cuffs are accented by vivid red taffeta bias binding. Matching shade red bone buttons emphasize side scalloped closing of bodice. Red suede belt completes this jaunty outfit.

Style No. 2947 is made at a remarkable saving, for in the 8-year size, it takes but 2 yards of 40-inch material with 3/4 yards of 32-inch contrasting. The bodice has a one-piece back; front in two sections. Seamed at sides and shoulders. The two-piece skirt is seamed at sides and pressed into inverted plaits at either side of front and attached to bodice. It is now practically ready to set sleeves into armholes and stitch collar at neckline.

Wool jersey in French blue with collar and cuffs of blue and white checked woolen is very smart. Beige and brown checked woolen with plain brown is sportive.

Featherweight tweed in mauve-red tones with plain red woolen can be worn all through the Fall without a top coat. Orchid chambray with white plaques, cotton broadcloth in geometric print in red and white with plain white piping, red and white gingham check with plain white linen, and tan sports weight linen with brown are attractive tubular fabrics. Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Places Huge Stamp Order

The Chinese government has just placed an order for the printing of 2,500,000,000 stamps. The contract was secured by a London firm and is said to be the largest order of its kind ever given to a firm in England. Printing of the stamps will start at once.

Prospects For Good Trade

Fresh Milk Would Find Ready Market In Orient

Canadians of all classes are accustomed to a fine quality of fresh milk. Most of them will be astounded to learn that there are countries where such milk is not available even to people who are ill. It is another revelation of our luxurious privileges that are just taken for granted in a rich country.

Having learned that some of our surplus products of the dairy might meet a crying need in the Orient, Canadians will prudently seek to discover if some business can be done in supplying the need. It requires fourteen days for a liner to carry the milk across the Pacific to Shanghai in refrigerators. Indications are that it can be done successfully. It has been transported to London in good condition. Both China and Japan are short of milk. There is an opening for Canadian export that would be very welcome among people who are rapidly adopting our diet. It demands skillful executive work to place Canadian products on the distant Oriental market, but even expensive experiments offer prospects of lucrative trade, and that is what will build up this country.

Rust Expert To Visit England

Dr. Craigie, Of Winnipeg, Will Spend Year In Study

Dr. J. H. Craigie, head of the Rust Research Laboratory, Winnipeg, is leaving at the end of July for England where he will deliver a paper in connection with his rust investigations at the International Botanical Congress, which is being held at Cambridge in August. Dr. Margaret Newton, of the Winnipeg Rust Research Laboratory is also attending this conference and will later visit various investigation laboratories in Britain and the continent.

Dr. Craigie plans to spend the next year at Cambridge and the other institutions studying their work and methods in connection with plant diseases, while Dr. Dillon-Craigie, of Cambridge, will visit the Winnipeg Institution in a similar capacity for the coming year.

Dr. Craigie was recently awarded the doctor's degree at the University of Manitoba, his thesis being on his work in connection with the discovery of sex in rust fungi. His work in this connection was considered the most outstanding achievement in connection with rust investigation that has yet been accomplished.

Planning New Air Mail Line

Group Of Japanese Business Men Behind Scheme To Report

A project of inaugurating a regular passenger and mail air line between Japan and the United States and Canada to shorten the distance between the continents to three days, is reported to have been organized by a group of Japanese business men and financed at a capitalization of \$75,000,000. Four huge airships, resembling the Graf Zeppelin, which encircled the globe last year, are expected to be employed for the regular air trips.

The Japanese Government has been officially asked for the necessary permits and those behind the enterprise say they propose to go right ahead with their preparations. Seld Hashino, noted Tokyo business man and one of the promoters, says the plan was projected last year shortly after the visit of the German dirigible. The single fare for a passenger, he said, would be \$1,500.

Deaths in civil aircraft accidents in England last year totalled 33.

Increase Of Wild Life In Canada's National Parks Proves Sanctuaries a Success

A dispatch to the Commissioner of National Parks, Department of the Interior, from A. Bryan Williams, Game Commissioner of British Columbia, announces the safe arrival of the carload of elk recently shipped from Buffalo National Park, Wainwright, Alberta, to the Queen Charlotte Islands. The animals are a donation by the Dominion to the Provincial Government for restocking purposes on these islands. They were captured from the wild elk herd, now numbering over 600, roaming the Buffalo reserve and were particularly fine specimens of their kind. They were cut out of the main herd by the park rangers, corralled until safe to handle, and then placed in specially constructed crates. Through the co-operation of the Canadian National Railways, a special baggage car was provided which was attached to the regular passenger train for Prince Rupert, and went through express to that port. Here the elk were transferred to a boat sailing to the Queen Charlotte Islands. No loss or injury was sustained in transit and according to the report the animals are already settling down and adapting themselves to their new surroundings.

The successful transfer of wild animals as large as these by rail and water for over 1,000 miles was in itself an achievement, but the greatest interest attached to the undertaking lies in its significance from the conservation point of view. A scientific philosopher has described this era as the close of the age of man. From every part of the world in the last quarter of a century have come reports that wild life was being destroyed at a far greater rate than it could reproduce itself. The inevitable spread of civilization, with its concomitants—the breaking up of land, draining of swamps, felling of forests and many other operations—has been destroying the world over, the natural home of big game. In recent years, too, the forces of destruction due to mechanical invention and greater facilities of transportation have increased enormously, and disastrous inroads have been made in many species.

A few years ago there was organized in England a conservation movement known as the Society for Preservation of the Fauna of the Empire. Its president, the Rt. Hon. the Earl of Onslow, in reviewing the depletion of wild life throughout the Empire today, stated that the only satisfactory method of ensuring the preservation of wild animals in the far distant future is by the formation of sanctuaries or the establishment of national parks. As an example of what could be accomplished, he cited the policy of the National Parks of Canada.

It will be recalled that about twenty years ago the national parks of this country were made game sanctuaries not only in name but in fact. An adequate system of warden patrols was established and the regulations rigidly enforced. As everyone knows the results have surpassed the most sanguine anticipations. Sheep, goat, bear, elk and deer, which had practically disappeared from these regions, have now come back in such numbers that the parks have become the wild life reservoirs of the West. The British Columbia Government has been drawing on them to restock its own depleted game areas. Two regions in the southern part of the province in recent years have been stocked with Rocky Mountain sheep—that much prized trophy of

the sportsman. Two or three years ago a herd of elk was also shipped from Buffalo park to re-stock areas between the Okanagan and Kettle valleys. The National Parks of Canada have also been able to furnish for their increasing stocks, big game sanctuaries for zoological exhibits or as nuclei for conservation experiments in various parts of the world.

These results prove clearly the truth of Lord Onslow's contention in a recent report, that an ultimate world bankruptcy in wild life need not be accepted as inevitable. While adequate protective measures, he pointed out, will help to maintain the stocks, it is only through the creation of national parks such as have proved so successful in Canada, that the final rescue of many species can be assured. Canada, he declared, is setting an example in conservation to other countries and its abundant success is a happy augury of what others may achieve.

Scottish Ayrshire

Export Trade Grows

Canada and States Taking Large Consignments Of Cattle

Scotland is rapidly developing an important export trade in Ayrshire cattle, the country's native dairy breed. The other week a consignment of 19 pedigree beasts, mainly from Ayrshire, was sent to Ontario, Canada.

High Bone, secretary of the Ayrshire Cattle Export Book Society, says that the hard trade has increased greatly in last two years. He added: "We have exported 173 head of Ayrshire cattle since the end of March, and as the average price is between £90 and £100 a head it is obvious that the trade is a very valuable one. Last year we presented 30 head of Ayrshires to the University of British Columbia to form the nucleus of a herd there, and since then two more consignments have gone there. Canadian and American dairymen are the best foreign customers for Ayrshires. They find that our cattle can produce milk with a higher butter fat content on small rations. Three Ayrshires can thrive on poor land where only two cows of other breeds could."

Young Poultry Fanciers

Fourteen Boys' and Girls' Clubs In Armstrong, B.C.

Armstrong, in the Okanagan Valley, holds the record among the towns of British Columbia, if not of Canada, for juvenile poultry fanciers, having no less than fourteen boys' and girls' poultry clubs with a membership of 120. This is largely due to the enthusiasm and organizing ability of G. W. Gamie. The majority of these young folk met in conference recently. They had a very enjoyable and profitable time, and, as they posed for a group photograph, they made an inspiring spectacle, boding well for the future of the industry in the premier poultry province.

Bank Manager: "I understand your husband can't meet his creditors, to particularly."

Client: "I don't believe he wants to, particularly."

Faint heart never won fair lady. Nor did it ever get away from one.

The astronomer's day is 23 hours and 56 minutes.

ON THE MIDWAY AT THE PROVINCIAL EXHIBITION, REGINA

Indigestion

What most people call indigestion is actually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude herbs. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia, prescribed by physicians for 50 years in correcting excess acids. Each bottle contains directions—any druggist.

WORLD HAPPENINGS BRIEFLY TOLD

Sir John Simon, head of the recent British mission to India, plans to return to India, August 3, aboard the "Duchess of Atholl."

French ports of Calais, Boulogne, Havre, Dieppe and Cherbourg are reported well satisfied that the British Government has decided against a tunnel under the English Channel.

Carol Caraiman, citizen, has become King Carol II. of Rumania, by a vote of the Rumanian parliament, which lacked only one of being unanimous.

Andrea Macedo, a Portuguese, sailed from Morocco, June 8, for New York, in a 30-foot sloop named the "Aufa." He was the lone passenger, sailor and navigator.

Any Johnson, whose lone flight to Australia has roused the British, has been given \$50,000 by Lord Rothermere's Daily Mail in recognition of her performance.

Two hundred members of the Agrarian Producers' Union, of the Argentine, will arrive at Victoria, B.C., on September 14, to commence a tour of Canada.

Passenger trains on the Continent are fast being equipped with radio receivers for passengers. The latest is the train from Havre to Paris. Passengers can hire headphones and listen in to Eiffel Tower Radio, Paris, or radio station 5XX.

The Prince of Wales and Prince George have both entered planes in the King's cup air race to be held July 5. Squadron Leader Don, who has been the Prince of Wales' pilot on recent flights, is expected to fly the royal heir's entry.

For the first time an aeroplane will be used for inspection of Indian agencies and reserves in the Mackenzie River district. Inspector C. K. Parker, of the Department of Indian Affairs will leave Waterbury, Alberta, early in July, on a northernly objective being Herschel Island.

Western Canada New Mecca

Request For Information Received From United States Motorists

Motorists in many parts of the United States, having exhausted the possibilities of travel in Eastern United States, are now looking to Western Canada as their new Mecca. This was the frank statement in a letter received by the local office of the Saskatchewan Motor Club from its Southern Illinois affiliation, the Auto Club of Egypt, which urgently requested a generous supply of maps, booklets, holiday and road information concerning Saskatchewan.

A Century Old Song

That fine old song "Rocked in the Cradle of the Deep"—a perpetual challenge to basses—was written by Emma Willard, nearly one hundred years ago. Emma, an American poet of note in her day, wrote it on July 14, 1851, after a violent storm at sea during a voyage she made aboard the good ship "Bally," says Thomas F. Madigan (in "Word Shadows of the Great"). So that she was one person at least who went to sea before writing about it.

In the first three months of this year 10 British army aviators were killed in five crashes.

Florida has a longer coast line than any other state in the Union.

W. N. U. 1842

Jubilee Impressions

A Few Reasons Why Manitoba Is Holding Celebration

The enthusiasm with which the people of Manitoba are preparing to celebrate the Diamond Jubilee of the Province, on July 15 next, might lead an outsider, unfamiliar with our progress and development, to enquire what it was all about. He would need to be told that the Province was formally admitted into the Canadian Confederation on July 15, 1870, and that the present generation was showing its pride and satisfaction in what had been accomplished in the sixty-year period.

The outstanding fact in connection with Manitoba's history as a Province is that her people have practiced agriculture, and it is impossible in the production of foodstuffs. One need not go far back into the annals of the nineteenth century to find a positive and emphatic declaration of opinion on the country's resources, from a man whose position should have given him the right to speak with authority. He was foolish enough to insist, on more than one occasion, that wheat would never grow in any place more than ten miles from the Red River. His cue was taken up by many lesser "authorities," and the whole territory was apparently doomed and damned as a source of cereal food supplies. What has been the real outcome? Manitoba's settlement has secured a first position of leadership in the markets of the world, and has held that distinction for more than forty years. Without desiring to reflect in any way upon the fertility of the Red River district, it may be added that most of the wheat is produced much more than ten miles from that famous waterway. Oats and barley add their testimony in rebuttal of the prophecies of men who should have realized the value of silence. The cultivation of grain, in fact, has provided the foundation for Manitoba's progress.

Farmers who knew their business came here from other lands, mostly from Ontario, to take a look at the soil and examine the other elements of crop production. In nearly every case one look was enough. Those who stayed and worked with energy and determination, succeeded in establishing forever the reputation of this Province as a centre of high-class agricultural prosperity. They were not daunted by weird tales of visitations of grasshoppers, drought, frost, hail, floods and all the other torments of the "crash-hanging" era. Nor did they flinch on the rare occasions when they encountered these torments, singly or in combination. They persevered and won through; perhaps they did not realize at the time that they were "achieving the impossible."

The dire predictions regarding the possibilities, or rather the impossibilities, of grain production were repeated and multiplied when it came to the consideration of other items relating to human sustenance. They were, it seems, to be disregarded as possible factors in the economic life of the new Province. Could live stock, for instance, be expected to prosper in a land where even the buffaloes, with unlimited grazing areas at their disposal, found it difficult to exist? Abundant, according to the wisecracks of that day. But the agricultural pioneers did not agree with them. They "knew their onions." They knew even more about their hay and grass, and chopsticks, and straw-stacks and shelter and stabling. They knew, too, that if a little care were exercised in choosing the proper breeds, and some degree of special attention were accorded the stock during the comparatively short periods of abnormal winter weather, good results could be obtained. The justification of their faith is to be found in the prize distributions at leading stock fairs throughout Canada and the United States during the past thirty years. Manitoba cattle

have held their own with the best that could be produced anywhere. It is a matter of gratification to the people of Manitoba that her first citizen, his Honor the Lieutenant-Governor, James Duncan McGregor, has risen to his eminence in the community largely through his success as a breeder of pure-bred cattle. That success has been due to intelligence, persistence, hard work and a refusal to believe that "it couldn't be done."

The story is the same in regard to other phases of farm activity. Who is there among the middle-aged people of Manitoba who does not remember the day when butter was a luxury? Eastern Canada was considered essential to human existence here? A quarter of a century ago it was almost impious to suggest that this Province should manufacture its own butter. Today the Manitoba product is known and appreciated all over Canada, and in many foreign markets as well. During the past ten years it has won most of the cups and prizes at leading exhibitions in every part of the Dominion, and has set a standard in the manufacture of butter which is a model for creameries in all the other provinces. As for eggs, the leading authority in the Dominion is on record with the statement that for excellent flavor and food value the product of the Manitoba hen is invaluable. Honey represents another instance where local achievement in the matter of quality has crowded out the foreign article. The canny housewife who buys a pair of jars of Manitoba honey knows she is getting the best that is to be had.

The refusal to lie down or retreat in the face of serious problems has always been a characteristic of Manitoba pioneers, and luckily that spirit persists in most of their descendants. Courage, patience, enthusiasm, perseverance and idealism, coupled with a lavish expenditure of muscular energy and perspiration, has gone far towards giving Manitoba so proud a place in Canada and in the Empire. Incidentally the products of famine and starvation have been put to shame. That in itself is worth while—Old Timer.

No Longer a Mystery

New Zealand Trade Commissioner Knows Why Canada Imports Sausage Cakes

"Until I went to Canada in 1926, I could never understand why the Canadians spent so much money in importing sausage casings from New Zealand—about 200,000 pounds a year," said Mr. J. W. Collins, New Zealand Trade Commissioner to Canada, at the Auckland Chamber of Commerce luncheon.

"I found the explanation when I landed at Vancouver, and went to a football match. I was greeted by a small boy, who solicited business in these words, 'Hot Dogs, 10 cents. Good for folks.'"

"In my travels through Canada I soon came to realize the enormous production and sale of the so-called 'hot-dog,' and I did all I possibly could to increase the production of that delectable food. When I am among the Canadians again, I am going to use my best efforts to induce them to put in a bit of butter with the bread and mustard that always accompany the 'hot-dog.' If they do, it will mean a great deal to other 19,000 tons a year of sausage casings from New Zealand."—Morning Herald, Auckland.

Protection For Air Pilots

Royal Air Force Is Introducing Fireproof clothes for wings and fireproof wings for their machines are to be introduced in the Royal Air Force. It is expected that as a result the tragic toll of deaths following airplane crashes will be reduced to a minimum.

A cheap and easily made fireproofing solution has been discovered for treating clothes and other fabrics. It is a mixture of borax and boric acid, and is said to be so effective, that when a four-ounce cotton fabric was treated, it could not be ignited by a naked flame.

The Fabrics Co-ordinating Research Committee has already approved the solution's use.

Fast Travelling George McDougall, a member of the Regina Flying Club, left for Winnipeg one afternoon recently, with W. Corson, in a Moth plane arriving in Winnipeg at 7 o'clock. Half an hour later he climbed aboard the mail plane for Regina arriving at 10:10, having made the round trip in eight hours.

"You're a dear, sweet girl," sighed the despondent sailor. "God bless and keep you! I wish I could afford to."

One shipyard in Glasgow, Scotland, now is employing 7,000 men.

Cutworm Outbreaks, 1930

Are Present In Exceptional Numbers and Over Wide Areas (Kenneth M. King)

The cutworm outbreak which was predicted for this spring is materializing in very serious proportions and over wide areas. Two types of cutworms are involved.—The Red-backed cutworm group generally throughout the park belt, and the pale western cutworm in a few districts as detailed below. It is important to distinguish between these two kinds, because of a marked difference in means of control. These cutworms are present in exceptional numbers, and the early hatching and generally dry conditions of this season are conducive to a heavy rate of damage, although the coolness of the spring has been somewhat unfavourable to the cutworms.

Districts involved.—The Red-backed cutworm seems to be generally abundant this year in the bush country, throughout the park belt, and into the adjoining margin of prairie land. It is particularly destructive in or near the surface of broad-leaved crops, though cereals may also be seriously damaged.

The pale western cutworm occurs in two areas:—(1) It is extremely abundant this year in south central Saskatchewan in the heavy soil of the Regina plains. The outbreak definitely extends from Balcarres, Indian Head and Sinitaulta on the east to Moose Jaw, and possibly to Estevan and Central Butte on the west. Southwardly, it probably extends to the International Boundary, in the heavy soil. (2) An outbreak is also expected in extreme western Saskatchewan, especially around Alaska, extending south to Medicine Hat, on the east, and Maple Creek to the south.

How To Distinguish.—Cutworms can be readily distinguished by their soft round bodies, and their habit of cutting off the plants completely as near the surface of the ground. The only other spring pest of similar type of damage is the wireworm, which can readily be distinguished by its smaller, hard, bright shiny yellow body, and the fact that it burrows the seed and lower stem, seldom cutting off the plant completely.

It will be noted that the two types of cutworms mentioned may both be abundant in certain districts. The Red-backed cutworm may be readily distinguished by the definite coloration,—usually a dull red,—upon the back, and the distinct lines lengthwise of the back. The pale western cutworm is almost colorless, except for the slight color given by the food and other contents of the body; it usually has a very greasy appearance.

Control Measures:—Red-backed cutworm: Poisoned bait is a very effective and practical means of control, either in gardens or in large fields, for all cutworms of the red-backed type. The important thing is to watch the fields closely and use the bait in time to save the crop. If a field is ruined, use of the bait will permit immediate re-seeding safely.

Three things are essential in using this bait for cutworms:—(1) The bait must be put out in the evening,

since it is only at night that these cutworms come above the surface to feed. (2) A warm night should be chosen; if the thermometer registers less than fifty degrees Fahrenheit at sundown, it will be too cool to secure a good kill of cutworms. Heat results are secured when the surface soil is moist. (3) The bait should be evenly spread over the surface, since the worms must come in contact with the bait in order to feed on it; a very thin application, 20 to 30 pounds per acre, is sufficient.

The bait is prepared as follows:—Bran, 25 pounds; Paris Green, ½ pound (or white arsenic, 1 pound); cheap molasses, 1 quart; water, 4 or 5 quarts.

The dry bran and poison are first thoroughly mixed together (keeping mouth and nose covered with a damp cloth, during the process). The molasses should be dissolved in the water, and this mixture then slowly stirred into the poisoned bran until it is thoroughly moistened and free from lumps. CAUTION.—Keep any unused bait or poison out of the way of children or animals.

Pale Western Cutworm:—Poisoned bran bait has not proved effective against the pale western cutworm; (hence the special importance of distinguishing it from the red-backed kind). In fact, there is very little that can be done, where fields are heavily infested by the pale western cutworm, except to avoid waste of seed by delaying re-seeding until the cutworms have ceased feeding. These cutworms migrate very little, even when a field has been eaten bare, and cases are known in which 4 or 5 seedlings have been destroyed in the same field in one spring. This year, re-seeding will probably be safe about the end of June; this is, of course, too late for most crops, but barley may perhaps be used, or oats for green feed or hay.

Where only parts of a crop are destroyed by this cutworm, the remainder may be partially protected by ploughing a deep furrow around each undamaged area.

Reports and Queries:—Circulars requesting fuller information about either or both of these types of cutworm may be had upon request.

Immediate reports of any important outbreaks which may occur in your district would be welcome.

Reports or queries may be addressed either to the Department of Agriculture, Regina, or to the Dominion Entomological Laboratory (University of Saskatchewan), Saskatoon.

Large Entry From B.C.

Canada will have on display at the Crystal Palace, London, England, during the fourth World's Poultry Congress, July 22-30, a grand total of 868 birds, with 453 exhibition birds and 244 production birds. The remainder will be made up of ducks, geese, and pigeons. A few specially good rabbits are also being sent forward. British Columbia's entries total nearly half of the production breed birds.

A Nevada man has invented an automobile attachment that flashes a lamp on the instrument board of a car when a tire is punctured.

SUNDAY SCHOOL LESSON

JUNE 25

THE RISEN LORD AND THE GREAT COMMISSION

Golden Text: "Go ye therefore, and make disciples of all the nations."—Matthew 28:19.

Lesson: Matthew 28:1-20.

Devotional Reading: Psalm 116:1-9.

Explanations and Comments

The Empty Sepulcher and its Message, verses 1-8.—The Gospels do not describe the resurrection; they report it simply and briefly. Matthew tells of the visit of Mary Magdalene and the other Mary to the sepulcher late on Saturday, the Jewish Sabbath, as Sunday, the first day of the week, began to dawn. Mary Magdalene was from Magdala, a city on the western shore of the Galilee, who had been freed from "seven demons," Luke 8:2, and who is often wrongly confounded with "the woman who was a sinner," Luke 7: "The other Mary" was the mother of James, Mark 16:1. These two had been present at the crucifixion and the burial, Matthew 27:66, 61.

Matthew adds here, what no other Evangelist does, "that there was a great earthquake, and an angel rolled the stone away and sat on it." His appearance was dazzling like lightning, and his raiment white as snow; through fear of him the watchers trembled and became as helpless as dead men. The Greek word for angel means "one who is sent as a messenger." The angel told them of the look of amazement and fear of the women. "Fear not," for I know that ye seek Jesus who hath been crucified." The "for" gives a reason for the soothing tone of the address. The angel recognizes them as "friends of the Crucified."—A. B. Bruce. Then he added the amazing news: "He is not here; He is risen even as He said." See Matthew 12:40; 16:21; 27:63. "Come," he further added, "see the place where the Lord lay." The condition of the tomb as seen by Peter and John is described in John 20:5-7.

The Glad Message, verses 7, 8.—They were not to stand long in mute amazement, but were to carry the glad news to others: "Go quickly, and tell His disciples. He is risen from the dead; and, He shall be before you into Galilee; there shall ye see Him: for I have told you." Recall His promise to the disciples Matthew 28:32.

"The Lord is risen indeed, He is here for your love, for your need. Not here in the grave, nor the sky, But here where men live and die; And His disciples, He is risen from the dead; 'Why seek ye the living among the dead?'"

Richard Watson Gilder. The Final Interview and Commission, verses 16-20.—"All authority hath been given unto me in heaven and on earth"; in these words Jesus asserted His royal authority; His right to command ruled upon the fact that He is King. The future of His Kingdom was His supreme concern, and He proceeded to issue His royal command: "Go ye therefore, and make disciples of all nations, baptizing them into the name," i.e., confessing their faith, "of the Father, and of the Son, and of the Holy Spirit, teaching them to observe all things whatsoever I commanded you."

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.
51 Wellington St. W. TORONTO, ONT.

LARGER VOLUME OF IMMIGRATION FROM BRITAIN

London, England.—Despite a decrease in the volume of British emigration to other parts of the Empire in 1929 as compared with 1928, emigration to Canada showed a substantial increase, according to the report of the overseas settlement committee, made public today. The report is confined to a statement of events in 1929 and it is presumed the general policy of the Empire governments with regard to overseas settlement will be discussed at the Imperial Conference in October.

During 1929 the total number of emigrants from Great Britain and Northern Ireland to non-European countries was 143,686, compared with 136,834 in the preceding year. Notwithstanding this increase in the total migration overseas the total who went to other parts of the Empire was 106,900 in 1929.

The figures for 1928 were 108,982. The number assisted to go overseas under the Empire Settlement Act increased from 47,855 in 1928 to 72,213 in 1929.

The substantial increase in the movement to Canada was due to the ten pound rate, the report states. The total movement to Canada was 65,558, compared with 46,709 in 1928. There was a decrease in the movement to Australia.

The report describes the scheme for settling 3,000 families on farms in Canada, which started in 1924, and is now completed, as the most successful large scale enterprise yet undertaken under the Empire Settlement Act.

New Order For Stockyards

May Be Permitted To Do Business In Restricted Areas

Ottawa, Ont.—Public stockyards were excluded from the restrictions placed on a designated area while testing for bovine tuberculosis is conducted, by an order-in-council passed by the Federal Government. It will mean that the Minister of Agriculture may issue an order that a public stockyard in a restricted area may be permitted to carry on its business just as if the area had not been established.

Saskatoon is the only place in Canada affected at the present time, officials of the Department of Agriculture said. While no order had been passed affecting the stock yards in that city, one is expected, they said. When tests of bovine tuberculosis are being conducted in a specified area, there can be no movement inward except that of tested cattle. Stockyards protested that this worked an injustice on them and that it seriously affected their business. This led to the order-in-council which excludes them from the restrictive terms.

Contracts End In December

Married Women Will Not Be Employed In Winnipeg Schools

Winnipeg, Man.—Married women will not in future be employed as teachers in Winnipeg schools, it was decided at a meeting of the school board.

Married women now employed will be given notice that their contract will terminate December 31, 1930, unless exceptional circumstances prevail to warrant continued employment after that date. It was also decided, in view of the existing unemployment situation, that the board will "record its disapproval of the acceptance by its employees of remunerative vocational employment."

Apply For Oil Leases

Prince Albert, Sask.—Saskatchewan's latest oil boom is apparently gathering momentum. The Dominion land office here has received two applications for oil leases on two sections of land in the vicinity of Kakwa, 17 miles south of Hudson Bay Junction, where oil and natural gas was struck by water well drillers recently. The applications have been forwarded to Ottawa for approval.

Plane Carried Huge Sum

Miami, Fla.—An aeroplane bearing two million dollars in cash arrived here from Jacksonville to meet, financial situation caused by the closing of the Bank of Bay Biscayne and four others. President Rohlf of First National announced the money would be used through other Miami banks to pay off all concerned in the closed houses.

W. N. U. 1942

Underworld Haints

Raided By Police

Six Hundred Suspects Are Arrested By Chicago Squad

Chicago, Ills.—Nearly 600 alleged hoodlums were rounded up by a special "strong arm" police squad slashed into underworld haints, bent on ridding Chicago "for all time" of criminals.

Stirred to drastic action for solution of the murder of Alfred ("Joker") Langle, Tribune reporter, and other gangland slayings, the squads, armed with shotguns, revolvers and tear bombs, crashed the tag hangouts with a vengeance. Patrol wagons, loaded, began arriving at police headquarters in a stream shortly after 10 p.m. and at midnight there was no sign of a let up.

The prisoners poured in so fast that the attaches of the bureau of identification were swamped and extra details were called on to assist in the work of booking.

As soon as word of the raids was circulated, a veritable swarm of attorneys, bondsmen and others interested in seeking liberation of the suspects also descended on headquarters, but their efforts came to naught, ball being thrown in each instance.

Jury Acquits Oliver

On Assault Charge

Son Of Ex-Premier Of B.C. Found Not Guilty

Vernon, B.C.—It took less than 20 minutes for the assize court to bring in a verdict of not guilty against Charles Oliver, son of former Premier John Oliver, charged with assaulting Dr. V. E. Latimer, in Penitentiary, last November 25. It was almost a foregone conclusion following the address of Chief Justice Morrison to the jury that Oliver would be acquitted and a murmur of satisfaction ran around the packed court room when the verdict was given.

Only four witnesses for the crown were examined and little time was lost by Hon. R. L. Mattland, K.C., chief defence counsel in cross-examination. Mr. Mattland put in no defence but immediately opened his address to the jury.

The jury retired at 3:40 p.m. and rendered their verdict at 4:00 p.m.

Legion Objects To

Fiction War Books

Condemns Those Not Founded On Actual Facts

Cardiff, Wales.—War should be no mere subject of the subject of works of fiction, was the view expressed at the annual conference of the British Legion here.

War books came in for a good deal of criticism and a resolution was adopted condemning books in which the author does not draw on actual facts and personal experiences. The elimination of war as a subject for fiction was urged as a measure of respect for dead and maimed soldiers. Another resolution urged the council of the Legion to take steps to counter the "insidious propaganda" contained in books which slandered the character of Great Britain and belittled the principles for which she entered the war.

Greeted By Home City

Hon. R. B. Bennett Receives Rousing Welcome In Calgary

Calgary, Alta.—Hon. R. B. Bennett is back at his western home after firing the opening gun of his election campaign at Winnipeg, followed by a second speech at Regina. The Conservative leader arrived in Calgary at a late hour, but a large crowd was on hand to greet him at the station, and wish the opposition chieftain success in his campaign.

The assembly cheered the Conservative leader time and again, and they lined up to shake him by the hand. The Californian Highlanders, of which Mr. Bennett is honorary colonel, were on hand and rendered music of welcome.

Survey Planned For Fall

Churchill.—Surveying of the townsite of Churchill will be done by the province of Manitoba, next fall, and construction will start next summer. Hon. D. G. McKenzie, Minister of Mines and Natural Resources, stated here.

Could Not Be Prevented

Boston.—No practical measures have been suggested which could have prevented or minimized the force of the 1929 stock market panic, according to Richard Whitney, president of the New York Stock Exchange.

Settles Old Dispute

Nova Scotia Not Liable For Millions Expenses During Strike

Ottawa, Ont.—The Province of Nova Scotia is "not liable to pay to his Majesty in the right of the Dominion all expenses and costs incurred by reason of the calling out of part of the active militia in aid of the civil power in Cape Breton" during June, 1925. This was the majority judgment of the Supreme Court of Canada, delivered by the chief justice here, Mr. Justice Newcombe dissenting, and Mr. Justice Cannon finding that liability was "conditional."

This settles a five-year-old dispute between the Dominion and the province in which the Dominion claimed reimbursement in the sum of \$133,116.73—the cost of despatching and maintaining troops of the permanent force in Cape Breton during the coal-miner strike of 1925.

Trans-Atlantic Trip

Is Postponed

R-100 Not Coming To Canada Until End Of July

Ottawa, Ont.—The R-100 will not begin her trans-Atlantic trip to Canada until after the general election on July 28. This was conveyed to the Minister of National Defence, Hon. J. L. Ralston, in a cable received here from the British Government.

The postponement of the dirigible's flight is in accordance with an agreement between Canada and Great Britain.

The start of the flight will be made during the last three days of July, the cable said.

PRINCE MAKES HIS FIRST WORLD-WIDE BROADCAST

Glasgow, Scotland.—Making his first world-wide radio broadcast, the Prince of Wales, standing on the famous Clydebank wharves on the occasion of the launching of the Canadian Pacific Railway line "Empress of Britain," said the building of the new liner was the most important milestone in the recent history of the British mercantile marine.

The vessel, the Prince said, represented the last word in ship-building and as to appointments would be found to have no rival. The building of what the Prince described as "this wonder ship" was another sign of the sound imperial policy of the Canadian Pacific Railway.

His Royal Highness went on to say the C.P.R. had built 16 vessels in Great Britain since the war at a cost of \$20,000,000 and this when ship-building in Great Britain was at a low ebb.

Winnipeg, Man.—Radio brought the voice of His Royal Highness the Prince of Wales from Great Britain to Western Canada as clearly as though he had been speaking directly through the microphone at one of the big Canadian stations. Listeners in all over the Prairie Provinces heard the heir to the British throne launch the new Canadian Pacific liner "Empress of Britain," his companion speakers being Lord Abercromby, British shipping magnate; and E. W. Beatty, K.C., President of the Canadian Pacific Railway.

Reception through CJRX at Fleming, Sask., and CKY, at Winnipeg, two units in the chain of 91 stations in Canada and in the United States that received the broadcast over beam wireless from England to Yarmouth, Quebec, was excellent, and enabled newspapers to take verbatim the report of the speeches of His Royal Highness and Mr. Beatty.

VISITING CANADA

Mrs. Ralph Booth, wife of Captain Ralph Booth, who will pilot giant dirigible across the Atlantic to Montreal, is now staying in Toronto, Ontario.

Ships Collide In Fog

Many Lives Lost When Passenger Steamer Rams Oil Tanker

Boston, Mass.—Planning oil, spilling from the decks of a steamer oil tanker, believed to have been the "Pinthia," of Fall River, was thought to have claimed the lives of more than 40 persons aboard that ship and the passenger liner "Fairfax," which was bound from Boston, when they collided in Massachusetts Bay.

So suddenly did the tragedy occur that not a single survivor of the tanker was believed to have escaped the fog-shrouded inferno which followed the impact.

At least a score of the "Fairfax's" passengers and crew were unaccounted for while the "Pinthia" carried a crew of 19.

Aboard the big passenger liner scenes of wildest confusion succeeded the shock of the crash. Men and women, believing the ship doomed, buried themselves into the sea only to perish amidst the raging oil which poured from the tanker in all directions. Others were burned in their berths by the white heat of the fire which seared the port side of the ship.

The flames which swept both craft melted their radio antenna and temporarily ended possibility of summoning aid. The tanker, after from stem to stern, slipped slowly into the water plunging from eight 20 minutes after the crash.

Ship Receives Page

Of "Evening World"

Was Sent By Radio and Picked Up Intact

New York.—For the first time a newspaper has been spread out on water and picked up intact by a steamer at sea.

The experiment was successfully concluded when the first page of the Evening World was sent to the United States liner "America," at the moment 2,310 miles from New York. The paper was sent by the Radio Corporation of America's new photo-radio apparatus.

A mysterious cylinder, with purple ink, spun out intact the newspaper page that had appeared on the sidewalks of New York. Pictures and type were reproduced as clearly as the ship, while the steamer was nearing her port of call, Plymouth, England.

Three Subs Launched

Barrow-In-Furness, Eng.—Three submarines for the British Admiralty—the "Regulus," "Regent," and "Rover"—were launched at one shipyard here within the space of 34 minutes.

First Bride on New Ship

When the new Canadian Pacific coastal steamer "Princess Elizabeth" was being welcomed to Vancouver recently with a civic luncheon, at which city and port officials praised the company for its initiative and foresight in building up such a fine coastal fleet, Mayor W. H. Halliday, Vancouver port superintendent, promised to present the first bride who travelled on the new ship with a bouquet. So when Mrs. L. Goudge boarded the ship with the groom, she was duly handed a bouquet by George Fitch, secretary to His Honor, as the first honeymooner to take the Vancouver-Victoria trip on the "Elizabeth." Picture shows, left to right, Captain R. W. McMurtry, marine superintendent, B.C. Coast Steamship Service; L. Goudge and Mrs. Goudge, and Mr. Fitch.

Successor Not Appointed

Australia Has Not Yet Chosen New Governor-General

Canberra, Australia.—In well-informed political circles it is stated Lord Somers, governor of the State of Victoria, will act as governor-general of Australia for about six months after the departure of the retiring Governor-General, Lord Stonehaven, in October.

The reason given is that Premier Scullin has asked to have the appointment of Lord Stonehaven's successor deferred in order to enable him to consult the Dominions office when he is in London attending the Imperial conference in October.

Some time ago the appointment of a native-born Australian to the post was mooted and the name of Rt. Hon. Sir Isaac Isaacs, chief justice of Australia, was mentioned. Premier Scullin at the time said there was nothing to prevent the appointment of an Australian.

Winnipeg Lawyer

Going To Norway

Will Represent Government Of Canada At Coming Celebration

Winnipeg, Man.—James C. Berg, Winnipeg barrister and a prominent worker in Norse societies for many years, received word of his appointment by Premier Mackenzie King as representative of the Dominion Government to the celebration of the nine-hundred anniversary of the introduction of Christianity into Norway, to be held at Trondheim, Norway, in July and August.

Mr. Berg is the son of one of the first Norwegian settlers in western Canada. Representatives of Saskatchewan, Alberta and British Columbia governments are expected to sail with Berg, early in July.

Simple Service For

Late F. E. Trautman

Many Attend Funeral Of C.P.R. Official At Fort William

Fort William, Ont.—Im impressively simple obsequies were held here for the late F. E. Trautman, for the last 18 years Canadian Pacific Press representative in Western Canada.

He was buried in the city where a large part of his career as a pioneer western newspaperman was passed as editor of the Fort William Times-Journal.

The cities of Port Arthur and Fort William were officially represented as was the railway company, and a large number of private citizens also paid their last respects. Interment was made in the family plot in Mountain View cemetery.

FIRE DESTROYS GRAIN ELEVATOR AT PORT ARTHUR

Port Arthur, Ont.—Three hundred thousand dollars damage is estimated as result of the destruction by fire of the Union Terminal Elevator workhouse. The building broke into flames from unexplained cause and the conflagration raged for more than ten hours before it was brought under control.

Thousands of lake-head residents, roused from their beds by the crackling of flames and the commotion caused by the action of all available fire-fighting equipment, gathered at the scene. The reflection of the flames, which swirled to 100 feet in the air, cast a red glow over the entire lake-front in the darkness.

Estimate of the damage was unofficial, as the head offices of the company are in Winnipeg, and representatives at the lake-head would hazard no figure as probable loss.

Fifty thousand bushels of grain stored in the work-house were destroyed as the flames roared through the structure, spurning efforts of firemen to place it under control. Eleven empty box cars belonging to Canadian Pacific and Canadian National Railways took fire on the siding adjoining the burning building and were completely destroyed.

Winnipeg, Man.—Officials of Union Terminal Limited, refused to estimate loss as the result of fire destruction of the company's work-house at Port Arthur. It was stated at the head office here that "absolutely no figures are available."

Only the cement tanks of the Union Terminal plant remain intact. The grain they contained may be ruined by heat. The watchman had a narrow escape getting out in the darkness after the light went out. Heat from the burning pile was intense.

CROP REPORTS ARE WATCHED IN OLD LAND

London, England.—The truth about the Canadian wheat crop is anxiously awaited here because of despatches from Canada, giving rise to the impression that there will be a shortage and that the price will be higher in the Old Country this coming winter.

The Winnipeg correspondent of The Daily Telegraph cables that Canada is faced with the prospect of another short wheat crop, adding "this important information was not obtainable from the Wheat Pool, because of their attitude that we told the truth last year and the world would not believe it; now the world can find out for itself."

He reports, too, that the Canadian farmer resents being called a Shylock because he wants a price for his wheat.

This despatch to The Daily Telegraph contrasts with the optimistic statement of the Dominion bureau of statistics, and has left the public here in doubt as to what prospects really are.

If the Canadian wheat crop is short and the price of bread rises, there will be an outcry by the protectionists in the Empire for aid from an understanding with Canada, and they will use this fact to advocate protection against Argentine wheat in favor of Canadian.

Mail Plane Badly

Damaged In Crash

Two Passengers From Calgary Cut By Flying Glass

Moose Jaw.—An air "bump" under the left wing of a mail plane caused it to drop 10 feet to the ground, collide with the flood light at the east end of Moose Jaw flying field, and flip onto its back. Two passengers, R. V. Price and F. A. Ogilvie, both of Calgary, and proceeding to the Lions' convention at Regina, were cut by flying glass.

The plane, Boeing CF-110, was badly damaged, two wings, the tail plane and the engine mount being bent and twisted. Work of repairing the machine was commenced the next morning.

Major Thompson, superintendent in charge of the Western Airways plant at Moose Jaw flying field, stated the accident was unavoidable and that the pilot was in the worst of luck when it had occurred. "It was just one of the bad 'breaks' which happen," he said.

Will Visit Native Land

Two Hundred and Fifty Icelanders Will Attend Celebration In Homeland

Winnipeg.—Two hundred and fifty Icelandic residents of Western Canada, most of them from Minnesota, left here by special train for Montreal, where they will embark for their homeland to attend the millennial celebration of the Icelandic parliament. Hundreds of their compatriots crowded into the station to give the party a royal send-off.

They sail from Montreal on the Canadian Pacific liner "Montclair." Most of them in the party were Hon. M. G. Bjornson, of St. Paul, who will represent the state of Minnesota at the celebration, and Captain Sigfrid Jonasson, of Arbog, Man., a resident of Canada for 58 years who, despite his 78 years, was among the most enthusiastic of the group.

Settlement For Swedes

Stockholm, Sweden.—Some Swedish people, who fled from the Ukraine because of unsatisfactory conditions under Soviet rule and who came here with the idea of joining relatives in Canada, have already emigrated to the Dominion. Arrangements for establishing the remainder in Sweden are proceeding satisfactorily. A public subscription, started for the purpose, resulted in about \$250,000 being raised and in addition a grant was made by Parliament.

Urges Second Term For Hoover

Fort Myers, Fla.—Thomas A. Edison told interviewers here that he would urge President Hoover to seek election for a second term. The aged inventor said "the United States government is the most inefficient big business organization in operation today," and he added he did not blame the president. The vast size of the business, he said, was responsible.

A chain of airports from coast to coast is advocated by the Canadian Chamber of Commerce.

Spectre Has Disappeared

New Border Measure Removes Fictitious Armed U.S. Patrol

The grotesque spectre of ten thousand heavily armed men marching up and down the Canadian border to enforce the immigration and customs laws of the United States, never more than a spectre, has been fading rapidly for several months, and when the interstate commerce committee of the House reported a border bill, the ghost disappeared.

The bill, as reported, provides for no military force, as was at first proposed, but merely for unification of the customs and immigration patrols under the treasury. It makes it illegal for anyone to enter the country except at a designated point of entry, but the exception has been enlarged and the regulation made easier by inserting a clause under which people living on the border or in the "neighborhood or vicinity" will be allowed to cross freely.

The border patrol, contemplated in the bill, will consist of about 700 immigration agents and 800 customs men, combined in the one civil service force. Prohibition enforcement agents are not included in the force.

Provision is made for enlargement of the patrol, if necessary, but no specific increases are mentioned. The sole regulation upon which Canadian eyes might be turned with some apprehension, is that prohibiting entry except at designated points, and Ogden L. Mills, under-secretary of the treasury, is authority for the statement that a sufficient number of points will be named to take care of commerce across the border.

At present a person may cross anywhere and make a report to the nearest customs and immigration station.

Makes Life Worth Living

Nothing Like Work Says Heir To Million Pounds

The last thing John Arthur Dewar, of London, England, who became a millionaire when the contents of the will of his uncle, Lord Dewar, were announced, would think of doing is to retire from business.

"If you stop work you might as well be dead," he said when notified he had been left a million pounds, etc. of legacy duty, by his uncle, the famous distiller and sportsman. "It is work that makes life worth living."

Dewar, who is 38 years old, added that he was old enough not to be excited about a million pounds, and he hoped to carry on his uncle's racing stable.

Refused the Bargain

Hotel Proprietor Not Anxious To Buy Dea Man's Shoes

A hotel man walked into a popular Broadway shoe store last night to buy a pair of shoes.

"I've got five pairs here you can look over and if you like them you can have them at a big discount. They were ordered by a fellow who died a few days ago, and of course, they're no good to him now," said the clerk.

The clerk showed the shoes. They were a great bargain at the price. But the hotel man shook his head.

"No, I think I'll give you a profit," he said. "I never have had a desire to walk in dead men's shoes," and he bought a pair that were so alive they squeaked.

Profitable Visitors

American visitors in Great Britain are estimated to spend as much as \$15,000,000 in that country every year. That amount does not include any clothes, etc., they buy to take home again; it is what they pay for entertainment and service while visiting.

It is difficult to understand why they call it income tax when it means that everything is going out.

The giant frog of Africa, the largest species in the world, sometimes weighs more than ten pounds.

"Do you draw teeth without pain?" "Certainly. At first I was affected a little, but now I don't mind a bit." —Gutierrez, Madrid.

Old Tea Package Press Found

Device Used By Late Hon. Peter Larkin Forty Years Ago

The first press invented and used by the late Hon. Peter C. Larkin, forty years ago, in putting tea in round packages, was located in the grocery store of Hugh Cooke, Kingston, Ont., recently. Mr. Larkin, until his recent death, was Canada's High Commissioner in London, England, and for years called America's "tea king," was the first to sell tea in package form. For the purpose he invented a galvanneal receptacle and did the work by hand.

Kingston was one of Mr. Larkin's favorite places when he toured the province as a travelling salesman for tea, and one of his friends' there was the late James R. Henderson, who, with his brother, kept the Italian Warehouse, a local store which dealt only in the choicest of goods.

Mr. Larkin wanted Mr. Henderson to go into partnership with him in the tea business. However, when Mr. Larkin's tea business increased to such an extent that he had to install machinery for packaging, the tea proprietor remembered his old Kingston friend by sending him as a souvenir of their days together the apparatus he first used in making tea up into packages.

This apparatus came into possession of Mr. Cooke who succeeded Mr. Henderson as proprietor of the old established house upon his death. Mr. Larkin had great faith in his tea packages, and prophesied that it would yield him a fortune some day, which prophecy was fulfilled.

Deserves Consideration

Canadian People Should Prove They Are Not Grumblers

A Canadian writing from the United States points out a point of difference between the two peoples. He says that Canadians have a habit of putting the worst face on things; the Americans make the best of every situation. He never hears Americans running down their community or their country. To the man living in his community is the finest place in the land; if there are hard times, little is said about them. On the other hand Canadians seem to take a delight in grumbling about how bad everything looks.

Canadians may be well advised to keep away from a false optimism; but at the same time it may be altogether too true that we like to grumble. Perhaps we could take a lesson from the people of the South. Their unfailing optimism and confidence in the country sets a fine example to the growing generation; the young American is loath to believe that he could go anywhere in the world and better his lot. It is quite probable that young Canadians, listening to the grumbling of their elders, get the impression that Canada is not a first class country and have an itch to go somewhere else.

This is a matter that deserves serious consideration and is worth discussion by the public. —Regina Morning Leader-Post.

Definition Was Accurate

A patient who complained of digestive troubles was told by a specialist that he was drinking too much and would have to knock it off.

"Well," said the patient, "what am I to tell my wife?"

The doctor thought for a few minutes and then said, "Tell her you are suffering from syncope. That will satisfy her."

The patient did as he was told. "What is syncope?" asked his wife.

"I don't know," said the husband, "but that is what he said."

When her husband had gone out the wife looked up the word in the dictionary and found it means "Irregular movement from bar to bar."

Churches and Publicity

Whether newspaper publicity is valuable or embarrassing to church conferences was a subject briefly debated by the Toronto Presbytery. It depends a great deal upon what subjects are being discussed, but there can be little question that, on the whole, publicity should be a good thing for church activities in general. Or, to put it another way, church activities should be of the kind which publicity cannot fail to help.

Opium Given To Children

Opium is only smoked in a few districts in India, but raw opium is eaten in most parts of the country, and over a great part of Central and Western India it is administered to babies to keep them quiet. This practice has increased alarmingly in certain industrial areas, notably the Bombay cotton mills where children up to three or four years of age are regularly "doped" while their mothers work.

Older Men Are Needed

Business and Industry Depend On Their Leadership Says Henry Ford

Henry Ford believes "more than ever" that business and industry must depend upon the leadership of men in mature years. He stated that he had found no occasion to change his previously expressed opinion that if all the men of 55 years and older were removed from industry "there would not be brains enough left to carry on."

"This is no reflection upon the youth of today," he said. "I think that while they are different, today's youngsters are a fine lot and they decidedly are not headed for perdition. Moreover, they have greater opportunities today than the youth of 40 and 50 years ago."

Mr. Ford was asked whether he always had conceded the wisdom of age.

"You didn't think that back in 1894 when you began tinkering with your horseless carriage, did you?"

"I always had older men for friends and I always went to them for advice. I could cite them one after another. Old men understood my idea better than young men did. With mature years I realized that more and more the value of that hadn't waked up yet," he replied.

Youth and age need each other, Mr. Ford went on. "Youth must look to age for its education," he said, "and age educates youth because youth interests it."

Problems To Be Solved

The Ones Connected With Airplanes Are Just Beginning

Society has not yet grappled successfully with the human life and health problems raised by the automobile. It should baste itself in auto to protect life and property from falling airplanes or objects falling out of airplanes, and it might first of all do what is easiest, insist that airplane motors be muffled and be kept muffled at whatever height or whatever regions. All these difficult problems will some day be solved, but by far the easiest time to do it is at the beginning. The airplane is still only at its beginning. The death rate caused by the automobile is a warning what the airplane may do in the way of destruction and disturbance unless the necessary remedies are applied.

An Effective Silencer

At a dinner one of the speakers was exceptionally long-winded. At the end of half an hour the chairman could stand the flow no longer. He changed his belt violently and the orator was so surprised that he sat down without completing his last sentence.

A guest sitting next to the chairman whispered with a sigh, "I wish I had a bell like that at home."

Flappers of Australia have taken up the beautifying idea.

A new attachment to a washing machine makes ice cream.

KILLED IN PARACHUTE JUMP

Kenneth Burgess, of London, Ont., who, in his first attempt at parachute jumping, was killed in a 2,000-foot drop over Dufferin field, Toronto, when his parachute failed to open.

Trouble Well Worth It

Canada Should Not Lose Interest In Arctic, Says G. P. Mackenzie

For both monetary and sentimental reasons Canada should continue to take an interest in her Arctic possessions, George P. Mackenzie, officer in charge of the Arctic expeditions of the North-West Territories branch, said in addressing an Ottawa service club.

Everywhere he went he was faced with the question "Is all this trouble in the Arctic worth while?"

In the first place it was dangerous to state that any land area did not possess value, Mr. Mackenzie continued. Great quantities of furs were already obtained there. When the United States purchased Alaska for seven million dollars many criticized the scheme. The animal exports from there now were valued at 14 times the purchase price. What might lie beneath the soil of these Arctic islands nobody yet knows.

Mr. Mackenzie believed that there were strong sentimental attachments to the Arctic possessions. The Eskimo were worth it. In fact were a wonderful people and the happiest he had ever met. "It would be a sad commentary on our so-called civilization if they were left to shift for themselves," he added.

Pen Will Be Preserved

The historic pen with which Premier Anderson, of Saskatchewan, signed the Natural Resources agreement, has now been safely mounted with a suitable inscription and will rest among the archives of the province. The inscription reads, "Pen used to sign the Natural Resources agreement, March 24, 1930." Incidentally this pen bears the inscription "Made in Great Britain."

Information For Visitors

Some 25,000 maps of Alberta have been sent to the offices of the Calgary Board of Trade for distribution by the Alberta Development Board, southern section, to points throughout Canada and the United States. The booklet is full of pitiful information of the sort valued by visitors.

PRINCESS VISITS EMPRESS

The "Empress of Britain," mammoth new Canadian Pacific liner, appears to be much in Royal favour, for not only she has the distinction of being launched on June 11 by H.R.H. the Prince of Wales, but she recently had the honour of being inspected by Princess Mary, who paid a surprise visit to the ship. Incidentally will be the largest vessel to be launched in Great Britain since the year 1914.

The Princess, shown above in the uniform she wears as Chief of the Girl Guides, made the 100-foot ascent to the decks in the workmen's electric hoist in order to inspect the vessel, and was loudly cheered by the workmen. After the visit to the steel hull, which has already been painted white, with a band of royal blue, Princess Mary inspected typical cabins and was delighted with the luxurious equipment and the use of Canadian woods for panelling and decoration. The ship's color design was first used when the liner "Medina" was thus painted to convey King George and Queen Mary to the great Durbar in India, in 1911.

The Value Of Libraries

Books Are Of No Benefit To People Who Do Not Use Them

Premier Ramsay MacDonald, speaking the other day at Manchester, had something to say about the value of libraries that is worth noting. You can, he observed, own much and possess nothing. Many a pauper with the indefinable quality of taste is far richer than the people who won the greatest amount of things. Mr. MacDonald's belief is that money has never yet been wasted on libraries and that investment in books is a capital investment, the capital of which never undergoes wastage or deterioration.

But he warns against the mere establishment of a library and then neglect of its use. "A library not used with appreciation and taste," he says, "is a charnel house, and books merely arranged in rows on shelves are like the coffins of distinguished families placed in their shells in vaults."

The comparison is a pungent one, but it is not unjust. How many individuals, impressed with the idea that it is the thing to possess a library, just give a wholesome order for books—sets of them, rows of them, and having set them up in a library, leave them virtually untouched for years? How can any such neglect be of the slightest benefit to the owner of such a library?

The man with a solitary shelf of well chosen books which he can read and re-read, and which are well-thumbed, is potentially far wealthier in spiritual goods than the man who possesses thousands of volumes and never takes a look inside them. A man should put as much care and thought into the selection of his reading as he does into the decisions that govern his daily business. There is nothing that will pay him more satisfying dividends in life.

The Age Limit

Something Wrong When Man Is Old At Forty-Six

How old is "too old?" Sociologists are growing worried because many industrialists are replacing middle-aged workers with young men. A man of fifty very often has a hard time finding a new job. In many quarters, evidently, a man is believed to be close to senility when he passes forty-five.

Most startling of all is the refusal of Captain John K. Davis to navigate the exploration ship "Discovery" on a voyage to the Antarctic. When the command was offered him, Captain Davis declined, saying that a younger man should be chosen. Yet Captain Davis is only forty-six!

That is putting the age limit pretty low. If a man of forty-six is too old for an important job, the premium on youth must be even higher than we had supposed.

Bahia, a Brazilian city built on two levels, now has two large high-speed American elevators to transport "commuters" from one level of town to the other.

Canada Sets The Pace

In Some Cases Dominion Is Outdistancing Other Nations

Impartial testimony to the progress Canada has made in recent years, which happens to be the period of the Mackenzie King administration, is given by S. H. Logan, general manager of the Canadian Bank of Commerce, in a comprehensive analysis of world business issued recently. Mr. Logan states that while the whole world has shown intense economic activity, bringing production to a new high level, the rate of increased production in Canada has exceeded that of the world by a wide margin in many important branches of economic life.

The rapid growth in the productivity of Canada since 1928 has given this young country of ten million people a place as a producer alongside of and in some cases ahead of the great nations of the world. Thus Canada is:

First in the export of wheat.

Second in automobile manufacturing.

Second in hydro-electric generation.

Third in the production of gold and silver.

Fourth in the production of paper and aluminum.

Fifth in the production of rubber goods.

Sixth in the production of zinc.

The Dominion does not rank very high as a producer of coal, petroleum and steel, but even with respect to these items production has grown faster than that of the world and is about to make a tremendous stride. As Mr. Logan observes, Canada's progress to date only gives a hint of her potential power. The collapse of stock market speculation on this continent leaves the physical structure of the world on a broader foundation than ever.—The Toronto Star.

Thought Everyone Was Satisfied

New York Architect Has Idea For Missing Letters Mattered

The days are past when love-letters can go astray in the Arctic, said the Rt. Rev. I. O. Stringer, Bishop of the Yukon, addressing the Women's Press Club, Toronto, on the north as it was 38 years ago, and as it is today. He told the story of Indian rain-drops arriving with the mail which had fallen through the ice into the water and which they had dried around a campfire neglecting to put the letters in the right envelopes. Mrs. Stringer had received a letter addressed to "Jock" from a girl who hoped that he would be back soon to marry her. When the Indians were blamed for mixing up the mail, they replied, "Didn't everybody get one?" But some, said the Bishop, did not feel like claiming the love-letters intended for them.

Needed Some Himself

A stout, old lady of 200 pounds was struggling valiantly up the steps of the street car.

"Step lively, Ma," urged the conductor with more familiarity than she liked. "If they'd given you more yeast when you was a girl you'd be able to rise better."

"Yes, young man," she retorted, "and if they'd given you a little more yeast you'd be better bred."

Site Of Grain Exhibition

According to a booklet dealing with Regina as the site of the forthcoming World's Grain Exhibition, it is pointed out that the city is the centre of the hard wheat area and that within a radius of 100 miles are found half the population of the province. The estimated wealth of that market is \$2,264,008,000 and the annual buying power \$332,666,625. The city's population is about 40,000.

Harry—"Don't you ever say candy for your girl?"

Jerry—"Why should I? She's always got some around the house."

"Why are you crying?" "I've lost a halfpenny." "Here's another one. Why are you still crying?" "Because I didn't say 'alpenrose'." Hummel, Hamburg.

TWICE BENEFITED BY SAME REMEDY

Recommends
Lydia E. Pinkham's
Vegetable Compound

Cobourg, Ontario—"Years ago when I had a sick father and a nursing baby to care for, I got all run down and I took Lydia E. Pinkham's Vegetable Compound to get strength to do my work. Another time, at Change of Life, I had severe headaches and felt tired all the time. I took seven bottles of Lydia E. Pinkham's Vegetable Compound and felt like a new woman. I recommended it to any woman who is at the age when she needs building up."
—Mrs. T. E. STEWART, R.R. 4, Cobourg, Ontario.

CHAPTER XVI.—Continued.

"Not he," said Grandma, "but he must have been made of India rubber to get off as easy as he did. Doctor Carter was just leaving the office, and the man landed right in his lap, so to speak, so he got a patient. I must say, if such a thing had to happen it was after it happened where it did, on account of the doctor. It was most two hours before the man was fixed up and steady enough to go along. The doctor took two stitches and got paid three dollars. It was a real interesting morning, and four people came in this afternoon just to hear about it. Well, dearie, did Jim tell you the news?"

"News!" echoed Charman. "I should say you'd told it yourself. You're out of breath, Grandma, with talking so long and fast. I'm sorry to be late, but Jim was going to East-boro and it seemed a pity to miss the ride when the foliage is so beautiful. I wish you could have seen it, too."

She turned toward the kitchen, the impending meal on her mind, but the old lady stopped her with a question: "But didn't he tell you about his mother?"

Charman came back to ask: "What about his mother? He never mentioned her."

"You must have made yourself extra diverting then," said Grandma seriously. "George K. stopped in, and 'twas he told me the news. It doesn't seem hardly believable—but Sarah Bennett's going to California!"

"To California?" repeated Charman in amazement. "And leave Jim?"

"My stars!" ejaculated the old lady. "Don't you know that Sarah Bennett wouldn't any more think of going without Jim than she thinks of going without a pocket handkerchief? It seems she hasn't been feeling very well, and Edward Howe thought a warm climate might help her. Her twin sister, Sophie, lives somewhere out that way, and they're going to her. What's more, George K. says if the climate agrees with her, the chances are they'll never come back! Didn't I say it had been an exciting day?"

CHAPTER XVII.

"That night when she lay in bed, staring at a crack in the ceiling that showed weirdly bright in the light of the harvest moon, Charman wondered if at the evening meal had been fit to eat. She had gone about its preparation in a daze, wondering why Jim hadn't spoken of this big change in his life—feeling sure that he wouldn't have confided in her wondering how Wickfield would seem without her old playmate to drop in of an evening, or to pick her up after school hours as he had today—telling herself vigorously that she wasn't one bit in love with him—admitting in the next breath that she would miss

him terribly. The clock in the Town Hall tower struck midnight before she closed her eyes.

Yet it had been a diverting evening because the Merry had stopped in for a chat with Grandma. Doctor Howe, also, had drawn up before the door, and summoning Charman outside with his familiar whistle, told her not to worry about her "job," that the school board would uphold her in case of trouble.

"But don't let Grandma hear a word about it," she implored him. "Has the deacon been to you already?"

"Not he!" smiled the old man. "He knows too well whose side I'm liable to take. I heard the story from Jim Bennett. Guess he thought I'd better be prepared. Good-night, child. I won't say a word to Grandma; but you can count on me in an emergency; and, if I know him, you can count on George K., too. Don't lose your sleep."

This short encounter had brought Charman's thoughts around to Jim, from where they had wandered during the Merry's call; but they were switched away again by John Carter, who was teaching Grandma three-sided bridge and went tittering Charman's assistance. They sat up till the unheard-of hour of ten!

Yet despite all these diversions, Charman couldn't rest. Her anxiety about the trouble with Deacon Purdie, and her hurt that Jim hadn't spoken of his plans, were poor bedfellows. She looked big-eyed next morning, and the doctor said at breakfast: "You didn't sleep well, did you?"

"Do you keep an X-ray machine back of those eyes of yours?" she asked. "No, I didn't sleep—that is, restfully. Our bridge game was too exciting. I felt as if I'd imbibed a pinch of coffee."

"I'll drive you to school," offered the M.D.

The girl shook her head.

"I'm just as grateful, but I need exercise, and it's a gorgeous morning for a walk."

"I kind of suspect," said Grandma softly, as Charman left them, going to the kitchen to prepare their lunch, "that she's bothered because Jim Bennett didn't tell her he was going to California. Seems funny, doesn't it? He never said a word about it; and so far as I know, no one else in Wickfield has ever been west of the Mississippi except George K. and Salina. They took a trip on their silver wedding anniversary—a delayed honeymoon, George K. called it, because they hadn't the money to take them when they were married. They went most everywhere—Yellowstone National Park, the Grand Canyon, and San Francisco, though I should think they'd have been afraid of earthquakes."

"Well, Doctor, I wonder will anybody break a neck in front of your office this morning. That accident was fortunate to happen where it did; but I guess if Little Baker had seen the narrow escape her cat had, he'd have had a spasm."

It was not a longing for exercise which made Charman refuse the doctor's offer of a ride that morning, but a desire to walk off the depression that persisted. She felt not only depressed, she told herself as she stepped out into the clear October sunshine, but irritable. Why should she care because Jim Bennett had left her hear the news of him from some one else?

"I wish," she mused, as she passed the portals of the First National Bank, "I wish I could put Jim and his affairs out of my mind for ever and ever!"—which shows that the irritability was not imagined. But this wish, ardent though it sounded, was not to be fulfilled. It was George K. Knowles, issuing from his wide, hospitable doorway, who again reminded her of her old chum.

"Hold on a minute!" he called, as Charman waved a greeting; and giving her Salina an unabashed and asty kiss, he fell into step with the new school teacher, although her destination was opposite to his.

"Just wanted to tell you not to worry about the school," he began at once. "The board will uphold you as long as the doctor and yours truly are elected. Just stick to what you know is right, my dear, and the deacon will have to crawl. What'll you do, Charman, when Jim Bennett isn't here to fight your battles?"

His kind blue eyes smiled at her as he retorted: "Fight them myself, or surrender ignominiously to the enemy." But her rising color didn't escape George K.; whose heart was young in spite of his gray hairs, and he said soberly:

"You won't be the only one in Wickfield to miss the boy, my dear. He's fast becoming my right-hand man. His father was my best friend, too—a good man was James Bennett, married to a selfish woman. Salina would take my head off for saying so, but I guess you know the truth. If Jim's father had lived, Sarah would have ruined his life some like-

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver. Headache, Dizziness and Biliousness surely follow. You must stimulate your liver, liver, for your liver is the seat of your life. With Carter's Little Liver Pills.

They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. They are not a purgative that cramps or pains, unpleasant after effect follows. On the contrary a good tonic. All Druggists 25c and 75c per box.

ly, and now she's doing her best to ruin Jim's."

"He should stick up for his rights, then," said Charman coldly, and lifted her chin the least bit higher.

George K. cast upon her a sidelong glance.

"Did you ever live in the house with Sarah Bennett?"

"Did you?" Charman countered.

"No, thank God!" George K. exploded, "but I know her kind. They break the spirit after a while, Charman, and Jim, poor boy, has known no other close companionship. Sometimes I wonder how he's kept his sense of humor and his kind heart."

"Well," as they reached the corner where Main Street turned off toward District Four, "it's late at the bank if I escort you any farther. You'll remember not to worry?"

"I'll remember, Uncle George," she answered gratefully, "and—thanks to Grandma the morning seemed to drag. John Carter had left shortly after breakfast, and even the R.D. man was behind time, so couldn't he brought me an advertisement?"

Grandma tossed it scornfully into the waste basket, and wished that something interesting would occur.

"Seems as if Wickfield was never so still before," she complained about to drag. John Carter had left shortly after breakfast, and even the R.D. man was behind time, so couldn't he brought me an advertisement?"

Grandma tossed it scornfully into the waste basket, and wished that something interesting would occur.

"All I've seen is Lizzie Baker hanging out her dish towels, and Mr. Merriy hurrying home from the post office with the paper. The children haven't had any spits, or the dogs either! Here come an auto. I do believe it's Jimmy, and he's stopping."

She was right. Jim drew up before the door, got out, kicked a suspicious looking tire, and then came in.

(To Be Continued.)

Used Experience To Advantage

Men Who Recovered From Insanity Leads Movement To Aid the Mentally Sick

One of the leading figures at a world conference on mental hygiene recently in Washington was Clifford Beers, who was himself an asylum inmate for some time as a victim of insanity. He ultimately got better and resumed his place in society, and when success came to him—he was a graduate of the University of Yale—he devoted his time to leading a world movement in aid of the mentally sick.

A man who has suffered from a terrible illness or affliction, and who, whether he gets better or it or not, devotes his time or money to the cure or prevention of that trouble in others, has found his true niche in life. None can appreciate what these things mean so much as those who have suffered, and it is probable that a great deal of the world's scientific progress arose from just such circumstances.

There is, however, one great scientific living, whose wisely skill has not contributed to the particular affliction from which he suffers badly. Thomas Edison is almost stone deaf, and has been this for many years, yet he has not produced a device to remove that condition. When asked why, he replies that he doesn't want to be bothered by people talking to him!

That may be just his little joke. But it does seem strange that he has never paid any attention to acoustical devices.

Of course, it may be that he considers it more a matter for medicine and surgery than for the electrical laboratory.

Named After Duke

Cambridge Bay, Victoria Island, was named by Thomas Simpson in 1839, after H.R.H. Adolphus Frederick, 4th Duke of Cambridge (1774-1850), and 7th son of George III. Thomas Simpson, Governor of the Hudson's Bay Company. Along with an experienced H.B.C. officer, Peter Dease, he explored the Arctic Coast from Alaska eastward in the years 1836-39.

London's force of police-women is to be doubled in strength. In 1925 the number was raised from 24 to 50. Now it is to be more than 100.

The line of the equator crosses no desert.

Old Secret Revealed

Cruel Sultan's Rod Of Power Held Concealed Weapon

The Red Sultan, an Abdul-Hamid II, was known, brought down into the supposedly civilized times of the nineteenth century both the splendor and the wickedness of a darker age. He won his name from the carelessness with which he sent people to a better world, for which they may or may not have been grateful.

One of his peculiarities was that he was never seen without a certain feigned sceptre in his hand. During a friendly audience he would use it as a staff, leaning his head upon the carved jade cross which formed the handle. In the midst of his throne room, and at the height of the masses which he ordered in the Near East he used it to emphasize the decrees by which thousands of men, women and children went to their brutal deaths.

None knew just why this symbol of his tyrannic power was always present, but recently, half a century after his death, the secret has been revealed.

Abdul-Hamid II. left his sceptre to his successor—the first time that it had passed from his hand. But fate ordered the dynasty in the form of a revolution, and the sceptre was thrown, the rod of power found its way into the care of antique dealers.

Recently a merchant in the Rue la Boetie, in Paris, took the sceptre from a shelf where it had long rested to show it to a customer. As he handled it he touched the jewels, and suddenly one of them gave way with a little click. He pressed harder, the sceptre opened, and there was revealed a long, thin, cruelly dangerous dagger.

The Red Sultan stands revealed as a man who was afraid, who knew that in the midst of his authority he was not safe, that visitor or soldier alike might attempt his life and who carried even in his own hand the only surety upon which he might depend.

A Real War Hero

Cardinal Lucon, Of Rheims, Served His Country Loysally

The death of Cardinal Lucon, of Rheims, removes one of the most notable ecclesiastical figures of the war period. When the German garrisons were trained upon Rheims, when the cathedral was shelled, and the trembling with their thunder, and part of the sacred edifice was actually smashed by German shells, the Archbishop stood faithfully at a post. He would not leave, though urged to retire to a place of safety. His place, he declared, was with his flock. He protested against the shelling of the edifice, and continued to fulfill his duties throughout the various bombardments. Later, he made his protest more effective, and it was his fiery letter to the Pope condemning the inhumanities of the German deportation of French folk from northern France that drew from the Vatican the famous message of rebuke to the German Emperor.

Cardinal Lucon was made of the stuff that wins medals in other walks of life honors and fame. The example of courage he set, his calmness, his resolute determination and his abiding faith, made the Rheims Cathedral a beacon towards which Frenchmen turned their eyes in the hours of agony. The cathedral still stands, and now its many hallowed memories are enriched by the record of a life devoted to the service of God and man, and the name of Cardinal Lucon is engraved for ever upon its scroll of those who stood firm in their faith during a period when men's faith was sorely shaken. He was a war hero just as much as were Joffre and Foch, and he served his country just as loyally.

Authors Are Prosperous

There has never been such a time as the present for English writers who catch the public taste. Within the last twelve months one author has made more than £60,000 by a single play, and another nearly £150,000 from a single novel. And, both are well on the right side of 40.

Persian Balm the creator and preserver of beautiful complexions. Tones is effect and wonderfully stimulates the skin. Safeguards and beautifies the most delicately-textured skins. Cools and relieves all skin, rubbed or irritated by weather conditions. Magical in results. A little gentle rubbing and a youthful freshness and delicacy is instantly created. Invaluable for softening the hands and making them beautifully white. Truly the perfect toilet requisite for the woman who cares.

Showed Canada's Efficiency

Opening Day At Antwerp Exhibition Found Building Complete To Last Detail

"Canada scored signally in the early weeks of the International Exhibition at Antwerp, and continues to lead and dominate the Fair," said Mr. T. Nolte, Director of Exhibits (Department of Immigration and Colonization), Canadian Pacific Railway, on his return from that exhibition, which still has six months to run. "The reason for Canada's prominence," Mr. Nolte explained, "is Canada alone of all the participating countries, had her building set up and finished, inside and out, on time. Not only that, but the whole area of the Canadian Pavilion was complete in the last detail of lawn and walks, shrubbery, hedge and flower beds. The whole ensemble in fact, was a striking achievement which, in a singular manner, gave an impression of efficiency that was decidedly a feather in Canada's cap."

WHEN YOUR CHILD IS FEVERISH

Give Him Baby's Own Tablets

The health of babies and little children is subject to rapid changes. Thus the mother must be on her guard. At the first sign of feverishness Baby's Own Tablets should be given—this may avert a serious illness.

Concerning the Tablets Mrs. Norman Lee, Uxbridge, Ont., says: "My little boy, now three years old, was not at all well. He was feverish and had no appetite. I gave him Baby's Own Tablets and he was soon well again. I would not be without them. Tablets as long as there are young children in the house."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Many Government Employees

One out of every five German receives a salary or financial aid from the Government, Minister of Labor, Adam Stegerwald, told the Reichstag budget committee. In all, he said, 12,000,000 persons are receiving money from the national treasury in one way or another.

Minard's Drives Away the Headache.

Travelers Hour Every Day

Traffic statisticians have figured out that one hour a day of the average Berliner's time is consumed riding on omnibuses, street cars or elevated or underground trains. This amounts to 15 full days a year.

Walter: "Would you like to drink Canada Dry, sir?"

Amerinda: "I'd love to, but I'm only here for a week."

There are 3,567,180 letters in the Bible.

Little Helps For This Week

"That you love one another."—John xiv. 17.

Give thy heart's best treasures, From fair Nature learn; Give thy love, and ask not, Wait not a return. And the more thou spendest From thy little store, With a double bounty God will give thee more.

—Adelaide Anne Procter.

The beautiful law of Christian love, life, and truth, is that the more we give of our own capital the more that capital increases. The widow's cruse of oil and barrel of meal increased as she distributed them; and a Christian's sunshine and happiness, faith and hope, will be invigorated and multiplied in proportion as he tries to make others hopeful, trustful, and happy.—John Cumming.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle of life and succumb to weakness. This preparation gives promise of health and keeps it.

Only One Restriction

Inquiry has been made at headquarters of the World's Grain Show, Regina, as to whether or not the number of exhibitors from any one province or state is restricted. There is no restriction whatever to the number of entries in any of the competitive classes except that an exhibitor will be allowed to make not more than one entry in any one class.

Null: "I started out on the theory that the world has an opening for me."

Void: "And you found it?"

Null: "Well rather. I'm in the hole now."

Keep FIRE at Bay with GYPROC

FIRE seldom visits houses having Gyproc Wallboard ceilings, partitions, walls and sheathing. On the contrary Gyproc has saved many homes.

This pioneer Canadian fire-safe gypsum board has a new Ivory coloured finish this year that makes decoration unnecessary (when panelled). It is just the thing to use for making extra rooms in the cellar or attic.

Quickly erected, inexpensive, structurally strong, Gyproc Wallboard gives permanent fire protection.

Your dealer's name is listed below. Ask him today for full information or write for interesting free book, "Building and Remodelling with Gyproc."

THURSDAY, JUNE 19th.

FAREWELL SERMON

The service held in the Anglican
Church on Sunday evening last,
was well attended, the church
being filled.

The service was the last to be
held by the Rev. J. Adams-Cooper,
who has been resident minist-
er at Crossfield for the past two
years, and who has left this week
for Barbados, B. W. Indies, hav-
ing accepted the incumbency of-
fered him by St. Anne's.

There will be a change in the
dates of the services to be held
at the Anglican Church during
the next two months and they
will be published in the Chronicle
each week.

Crossfield: Sunday, June 29th.
Matins and Holy Communion.
Rev. Canon Gale.

BASEBALL DOINGS

The local baseball team won a
double-header from Drumheller
on Sunday, when they slugged out
a 12-2 victory in the first game
and won the second by a score of
4 runs to 3. The second game was
a real contest. Angus Robertson
was on the hill for the locals and
he pitched good ball. Lee done the
firing in the first game and after
the first inning had the miners
eating out of his hand.

Manager Bills sent in Smokey
Williams to stop Didsbury on
Monday night, and his selection
was good at that, as Glen held
them to two earned runs. It was
a great game and a pitchers battle,
and the score at 1-1 until the
eighth innings, when Didsbury got
4 runs on three hits and three
errors. Crossfield got a lone run
in this frame. The last inning
was scoreless and the game stood
5 to 2 in favor of Didsbury.

Crossfield went to Innisfail on
Wednesday and won another
league game when they ham-
mered out a 14 to 2 victory. This
gives Crossfield a strangle hold on
first place, with ten wins and 2
losses.

Don't forget the Little World's
Series on Sunday.

The Crossfield Junior Baseball
Team won a double header from
the Calgary Cubs at the local diam-
ond on Saturday, June 15. Mair
and Collins pitching and James
catching in the first game; and
James pitching and Hewitt catch-
ing in the second game. Gilchrist,
1st; Collins, 2nd; Campbell, 3rd; Mc-
Fadyen, 3rd; Fleming, Johnson,
Pogue and Knowles, fielders.

Score in first game 11-7; in sec-
ond 14-8. Calgary taking the short
end of both games.

Local and General

Reserve July 4th for Crossfield.
Mrs. Gazeley spent the week-end
in Calgary.

The Provincial Fire Inspector
was in town on Tuesday morning.

Get your stationery and school
supplies at the Chronicle office.

Mrs. Belshaw and sons spent
Monday in Calgary.

Mr. and Mrs. Crickshank were
visitors in Calgary on Monday.

Mrs. M. Hewitt entertained at
bridge on Saturday evening in
honor of Mrs. J. Marshall.

Mr. and Mrs. Gilchrist and
family spent Sunday afternoon at
Bowness Park, Calgary.

Miss Jean McLees of Castor is
visiting her sister Mrs. Angus
Robertson.

Hughie McIntyre has just com-
pleted a well for Everet Bills which
has 85 feet of water in it.

Remember, Crossfield's Sports
Day and Celebration on Friday,
July 4th.

We understand there is no truth
in the rumor that Hughie McIntyre
is to be appointed to the Senate.

The Inverlea Ladies Aid will hold
their annual picnic on July 2nd at
the home of Mrs. Deeks.

Mrs. P. J. McAnally who has
been visiting in the Peace River
district, returned home on Satur-
day last.

Mrs. J. Marshall who has been
visiting Mrs. Hewitt for the past
week, left on Sunday for her home
at Eckville.

Mr. and Mrs. W. H. Ball and
family of Calgary were visitors at
the home of Mr. and Mrs. W. H.
Miller on Sunday.

The many friends of Harry Hew-
itt, son of Mr. and Mrs. M. Hew-
itt, will regret to learn that he is
seriously ill with pneumonia.

Everett Bills has donated \$5.00
to the Sports Committee for a
quarter mile foot race on July 6th.
Entrants to be 20 years or under.

Mr. and Mrs. Marston and Mrs.
Morley Turner all of Calgary, were
brief visitors in town on Monday
evening.

We are glad to report that little
Freddie Waldoek, son of Mr. and
Mrs. Waldoek, is on the road to
recovery after his recent serious
illness.

Angus Robertson won second in
the cafe roping contest at the Stam-
pede at Sundre last week. Angus
is now busy practicing for the Cal-
gary Stampede.

The C. P. R. surveyors have
vacated the Whitfield residence
on Hammond St., taking up living
quarters under canvas on Main
Street.

Mrs. Gilchrist Mrs. Waldoek
and Mrs. Baker were visitors in
Carstairs on Thursday afternoon
last, where they attended the W.
M. S. meeting. Mrs. Waldoek
gave a talk on Mission Work.

Mr. and Mrs. Spivey have re-
nted the Laut residence recently
vacated by Mr. and Mrs. E. Dev-
ina. Mr. and Mrs. Charlie Mil-
land have rented the house vacat-
ed by the Spiveys.

Margaret Stewart and James
Sackett from Floral and Cath-
erine Laut and Louis Lennon from
Sunshine, attended the Junior
U. F. A. University Week at Ed-
monton, June 4 to 11.

The Calgary Dodgers, Provin-
cial Amateur Baseball Champions
will play a double header at the
local diamond on Sunday after-
noon at 3 and 5 o'clock. This
will bring together the best am-
ateur teams in the province.

A lawn tea and pantry sale, under
the auspices of the Ladies Aid of
the United Church, will be held at
the home of Mrs. W. McRory on
Saturday afternoon, June 28th at
3 o'clock, to which every one is in-
vited to attend. Convenors: Mes-
dames Mobbs, Smeaton, Griffith
and Murdoch.

In such pleasant surroundings a
cup of tea is doubly inviting.

Results of School Sports Held at Community Hall

A very successful sports day
was held at East Community Hall
on Friday, June 6th in which the
following schools competed for
honors: Elba, Floral, Meadow-
side, Rodney and Tan-y-Bryn.
Rodney winner of trophy for
second year.

1. Rodney 134 points
2. Tan-y-Bryn 96 "
3. Floral 70 "
4. Meadowside 63 "
5. Elba 14 "

(Elba, however, only had two entries
at the sports.)

Winners of Medals

Alfred Ohlhausen, Rodney 35 points
Louise Robinson, Meadowside, 25 points
